Does China have a tax rebate for solar panels?

China's Ministry of Finance and State Taxation Administration have announced a reduction in the export tax rebate for photovoltaic products. Starting Dec. 1, the rebate for unassembled solar cells (HS Code 85414200) and assembled PV modules (HS Code 85414300) will drop from 13% to 9%.

Is the federal solar tax credit refundable?

In 2020 - 2021, the ITC was reduced to 26%. The Inflation Reduction Act of 2022 reinstated and renamed the program the Federal Solar Tax Credit (now known as the Clean Residential Energy Credit) and raised the credit back up to 30%. The Residential Clean Energy Credit is non-refundable.

What is a solar tax credit?

The federal Residential Clean Energy Credit is commonly known as the "solar tax credit" because it can help defray the considerable costs of adding solar panels to your home. The credit equals 30% of the costs of new, qualified clean energy property for your home installed anytime from 2022 through 2032.

Do solar panels qualify for a tax credit?

The installation of the system must be complete during the tax year. Solar PV systems installed in 2020 and 2021 are eligible for a 26% tax credit. In August 2022, Congress passed an extension of the ITC, raising it to 30% for the installation of which was between 2022-2032.

Why is the solar export tax rebate coming down?

For solar, the rebate has been available since 2003. According to industry experts, the move to bring down the export tax rebate is aimed by the administration at checking overcapacity concerns because of which prices in the PV industry have dropped to record lows.

What is the new solar tax credit for 2033 & 2034?

That will decrease to 26% for systems installed in 2033 and to 22% for systems installed in 2034. If you've already installed a system in 2022, your tax credit has increased from 22% to 30% if you haven't already claimed it. The solar+storage equipment expenses included in the ITC have expanded.
