

# Solar Panel Telescopic Ladder

What is a solar panel ladder?

Solar Panel Ladder has been designed to offer a safe, practical way of working when installing or maintaining solar panel arrays. Bridging ladder provides 23 cm clearance from the roof to the underside of the stile, allowing plenty of work space, and up to 4.6 m free span over the roof.

What is a solar bridging ladder?

Ideal for repairs, inspection and maintenance, The Solar Bridging Ladder makes it easier to safely reach the solar panels once on the roof. Its three-part design is lightweight and easy to use. The CoverSafe Spark provides protection when working in loft spaces, especially for installing solar inverters.

How does a PV ladder work?

A pulley system is attached to the top of the ladder. A patented module "hook" attaches to the edge of a PV module frame and prevents lateral sliding of the module in the hook. An operator pulls the rope to raise the module. The module slides along the outward facing surface of the ladder rails.

How do I contact solar panel ladder?

Order hotline and friendly advice. Call: 01452 520 144 Easy and safe access over solar panels during installation and maintenance. Solar Panel Ladder has been designed to offer a safe, practical way of working when installing or maintaining solar panel arrays.

How does a ladder module work?

An operator pulls the rope to raise the module. The module slides along the outward facing surface of the ladder rails. "Ramps" allow the module to slide over any discontinuities in the ladder surface (e.g. the step between sections in the ladder).

What is a solar line access system?

The SolarLine Access System consists of a Solar-Dec platform integrated with a hoist and connected by an Easi-Dec Catwalk to an Easi-Dec standard platform. Ideal for repairs, inspection and maintenance, The Solar Bridging Ladder makes it easier to safely reach the solar panels once on the roof. Its three-part design is lightweight and easy to use.
