

# Solar panels EU tariffs

Why did the EU impose tariffs on Chinese solar panels?

petition to the European Commission against alleged unfair competition. After an investigation, the EU imposed tariffs on solar panels imported from China, prompting

Should European solar energy be subsidized by tariffs?

“Instead of sanctioning the entire industry through tariffs, we must incentivize solar installations that originate from resilient European solar production. This way, the deployment of solar energy can continue undisturbed while the European solar manufacturing can grow steadily,” said Erfurt, who is CEO of Swiss solar cell maker Meyer Burger.

Could EU tariffs protect solar producers from cheaper Chinese electric vehicles?

The European Commission this month launched an investigation that could lead to tariffs to protect EU producers against cheaper Chinese electric vehicle imports. Meanwhile, Germany is examining options including trade protections to shield local solar manufacturers from falling global prices, a government document seen by Reuters showed.

Does the EU impose a dumping duty on solar panels?

the imposition of measures is not against the Union interest. On the basis of these findings, it has been decided to impose an anti-dumping duty in a two-staged process: for two months, a duty of 11.8% will have to be paid, whereas from 6 August, duties ranging from 37.3% to 67.9% (averaging 47.6%) will be levied on solar panels from China.

Why is Brussels scaling back tariffs on Chinese solar panels?

Brussels is scaling back tariffs on Chinese solar panels as it seeks to settle divisions over penalties against Beijing for dumping products on European markets. Two sets of EU tariffs will be extended for 18 months under a decision on Wednesday by the European Commission, which previously wanted to prolong the penalties for two years.

How much does the EU import solar panels from China?

Bilateral trade in goods between the EU and China already well exceeds EUR1 billion per day. In 2012, the EU imported solar panels from China worth about EUR11.5 billion. Regulation to register imports of solar panels from China was published on 5 March 2013 (Publication in the EU's Official Journal).

investigation, the EU imposed tariffs on solar panels imported from China, prompting the latter to immediately launch an anti-dumping probe on European wine. Since the EU is China's largest trading partner and China is the EU's second largest partner, both parties decided to settle the dispute through negotiations instead of starting
