Why should you choose solar power integrator?

These factors, combined with the financial incentives and energy independence that solar power offers, consistently result in satisfied and happy Solar Power Integrator customers. While our office is located in Corpus Christi, we regularly service the entire South Texas region and do perform jobs in most places across the great state of Texas.

What is solar systems integration?

Solar systems integration involves developing technologies and tools that allow solar energy onto the electricity grid, while maintaining grid reliability, security, and efficiency. For most of the past 100 years, electrical grids involved large-scale, centralized energy generation located far from consumers.

What types of solar installations do you offer?

We offer residential & commercial solar installations. In addition, we also do grid tied, off grid, and micro grid installations. If you have a system that needs to be serviced, we can help you! You'll never have to run an extension cord through a window or door again.
