Today, China has the world's largest renewable power capacity, including 323 gigawatts of solar, around a third of the entire global total. President Xi Jinping wants to increase that to 1,200 gigawatts by 2030-- more than the world's current total -- but the country is likely to reach that goal even sooner. In 2022, it's set to add a further 108 gigawatts of solar power, ...
