Who is state power Investment Corp?

State Power Investment Corp, the world's largest investor in solar power generating plants, has been stepping up efforts in clean energy transformation and is now taking a lead in the sector.

What has changed at State Power Investment Corp?

“State Power Investment Corp has undergone earthshaking changes through transformation from a thermal-intensive to a green power-dominated energy company, and from a traditional power generation enterprise to a forerunner of clean energy,” said Qian Zhimin, chairman of the company.

Who is SPIC solar?

SPIC Solar has been focusing on BC technology since 2017 and has been collaborating with ISC since 2019, adopting the proprietary Zebra IBC solar cell technology. It has now become one of the world's major suppliers of BC products, offering high-efficiency BC solar cells and modules for various scenarios.

How much solar power does SPIC have?

Of this installed power, around 10.28 GW was for solar installations and approximately 11.58 GW for wind farms. At the end of last year, SPIC reached a cumulative clean energy capacity of 98.88 GW, of which 60.49 GW is solar, which makes the company the largest PV asset owner in the world.

How many solar plants does SPIC have in 2023?

As of 2023, SPIC holds over 69.19 GW solar plants, ranking 1st in the world for 8 successive years, also the biggest clean energy supplier in the world.

Where is SPIC solar made?

SPIC Solar currently produces IBC panels and the new TBC product at its two manufacturing facilities, which are located in Xining, Qinghai province, and Xi'an, Shaanxi province. This content is protected by copyright and may not be reused.

State Power Investment Corporation has witnessed a six-fold increase of its installed photovoltaic capacity in the past five years, making the company a leader in solar installed capacity growth worldwide, a company official said. The increase has exceeded 35 million kilowatts, ranking first on the global stage, company chairman Qian Zhimin said.
