Roof Replacement Solar Expertise. Solar panels come with a 30-year warranty, which means they're destined to outlast the roof they're installed on. When the shingles come off, the panels need to come off first. And once the new roof is securely back in place, that PV system needs to get put right back where it was. Our removal and replacement process. Comprehensive ...

The amount of power loss in solar panels depends on the type of panel and the environment it is installed in. Solar panels generally lose about 0.5%-1% of their efficiency each year. This means a 10-year-old 300-watt solar panel will produce about 270 watts of power.

Stitt Solar will be here long after your installation is complete to answer any questions and ensure your system is producing clean, renewable energy for years to come. Get Your Free ...

Solar Components Solar Materials Production Equipment. ...

Before installing solar panels, it's worth it to get your roof inspected unless it's new. While metal roofs and tile roofs can last over 50 years, asphalt roofs usually only last up to 30 years. So even if your asphalt roof is just 5-10 years old, you'll still want to make sure it will last as long as your solar panels.

Going solar is simple when choosing Arkansas' solar energy pioneers. Get the most efficient solar panels in Arkansas. Over 40 years of experience.

Stitt Solar offers comparable warranties on its solar products and panels. Where the company falls short is its workmanship warranty. Stitt Solar's workmanship warranty is only three years. This means any repairs to a solar system beyond three years of installation will not be covered by the warranty.
