

The wholesale price of the new generation of high pole solar street lights

How much do solar street lights cost?

The cost of all-in-one solar street lights is much cheaper than that of Split-type solar street lights. Its average cost ranges from \$90 to \$200. The installation cost is not included in the given price. Two-in-one solar street lights have a solar panel installed on the body lamp's top powered by batteries, LED fixtures, and controllers.

How much does a split solar street light cost?

Split solar street light's cost varies according to its materials, poles, and installation. Typically, the entire set costs double the price of an integrated solar street light with its average cost ranging from \$150 to \$400. The installation is not yet included in this average total cost.

What are integrated solar street lights?

Integrated solar street lights are light sources that are used outside to light the streets. They are usually integrated into a pole or mounted on street walls and other lighting structures. These lights are composed of solar batteries and photovoltaic panels, which charge the battery to power the LED lamps or fluorescent light at night.

What is a split-type solar street light pole?

A Split-type solar street light pole is usually more than 5m in height with high gravity center while its solar panels are designed in hanging type to make the whole equipment set more wind resistant. Split solar street light's cost varies according to its materials, poles, and installation.

What is solar LED street light?

Solar LED street light comprises Solar PV Module for battery charging, inverter, controllers, poles, and light-emitting diode (LED) lamps for its light sources. Among other lamps, LED is one of the practical and common lamps because many manufacturers offer them in a variety of styles, shapes, and sizes.
