

# Things to note when buying a solar system

How do I buy a solar power system?

The first step in buying a solar power system is determining your energy needs. You can do this by analysing your electricity bills for the past year to see how much energy you use on a monthly basis. This information will help you determine the size of the solar power system you need to meet your energy needs. 2. Length of manufacturer's warranty

Should you buy a home solar power system?

Buying a home solar power system can be a very exciting experience, but don't get too carried away by advertising. Be sure to focus on the important aspects of your purchase as it's a substantial investment and one you'll be living with for a long time. The following are some buying solar tips on what to look for when purchasing a system.

What should I Ask A solar salesperson?

Ask the salesperson or advisor how the equipment, design, and financing options were selected to help meet your goals. Brian Lynch's advice: Dealing with an unbiased advisor or advocate versus a commissioned salesperson can make all the difference in the world. 5. Am I thinking about solar the wrong way?

How do I choose a solar panel for my home?

Homes with south, southeast, and southwest facing roofs are among the best candidates for solar panels. Finally, homeowners should consider the amount of shade near their roof and how that may impact the amount of sunlight hitting a panel. Factors like trees, neighboring homes, and other tall objects can impact the amount of sun your roof gets.

How can I avoid solar problems?

Learn more about the potential issues and how to avoid them in our consumers guide to solar power - avoiding tricks and traps. One of the best buying solar tips is to make sure to use an accredited solar power system installer, certified by the Clean Energy Council.

Should you buy or lease solar panels?

Yes. Some homeowners opt to lease the solar panel system rather than purchasing it. They pay a monthly fee for the energy generated, which can be significantly lower than the fees paid to your local utility company. When you lease solar panels, the solar company owns the actual panels and system.

If you're considering buying a solar power system, it's important to have a guide to help you make an informed decision. A good solar buying guide in Australia should cover factors such as determining your energy needs, understanding solar panel efficiency, checking for government incentives, researching solar panel brands, considering the ...

# Things to note when buying a solar system

Cash, loan, and lease options are all available when it comes to how to pay for the solar panel system.
