

UK original battery model query system

What is the OE battery fitting information?

The battery fitting information is supplied by the OE vehicle manufacturer from the workshop manual procedures used at main dealer. It lists the procedures that must be carried out prior to battery removal, after battery installation, the location of the EOBD connector and any special equipment required for the procedure.

How do I access OE battery replacement information?

In order to enable access to vehicle specific OE battery replacement information the user must first register on the website and create an account with a unique password. Once this process is complete logging in to the site prior to carrying out a battery search allows access to the battery replacement information.

How can I supply battery type data?

With great accuracy we are able to supply Battery type data from VRM (Vehicle Registration Mark) or number plate. Using our standard REST API you will have access to a large amount of data including manufactures part numbers, images and types. The API is easy to integrate and supplies all data in a modern JSON response.

How do I use the batteryfinder look-up?

When using the look-up - batteryfinder.manbat.co.uk - users simply need to enter the registration number of the vehicle in question into the search box and the site will use a sophisticated VRM look-up database to locate the correct vehicle and provide access to its vehicle-specific details.

What is the best battery lookup tool?

As Europe's most advanced battery lookup tool, Yuasa's super-fast USB Smart Button and Online Battery Lookup system is designed for the trade and already used by over 75,000 technicians. This powerful tool saves workshops valuable time and money by allowing technicians to find the right battery and detailed fitting information quickly and easily.

Should I check battery specification before buying a new battery?

Always check the specification against your existing battery before purchase, any results given by the battery look ups are given as a guide only and not always correct.

*whichever occurs first. Powervault 3. Powervault is a UK-based company with a mission to lower people's electricity bills and carbon footprints. Their most popular solar battery is the Powervault 3, and for good reason too. One of the main selling points of the Powervault 3 is that it is installed as an AC-coupled system directly into the electrical supply on your home's fuse box.

Below are our battery look up tools, these will give you a reference to check against your existing battery, It is important that you check your

Yuasa has become the first battery brand to offer registration lookup for motorcycle, commercial vehicle and automotive batteries. The ground breaking feature means that for the first time users can use a number plate to find the correct battery for all common vehicles registered in the UK, be it a commercial vehicle, light van, car or motorcycle.

OE = Original Equipment, The OE number generally has 4-15 digits made up of letters and numbers and can usually be found at the top of the cap (label) in the case of the starter and on-board electrical system battery.

Each car battery in the UK is labeled with a 3-digit code, which can usually be found on your current battery or in your car's specific handbook. If you already know your 3-digit battery code, you can browse our selection of popular options below. However, if your specific code is not listed, don't worry! You can get in touch with us to find a ...
