

Waterproofing of power-limited solar panels

When solar panels produce excess power, that power is sent to the grid. And this power can be "taken back" when the solar plants are not functioning - example, during the night. When a unit of solar energy that has been "net metered", the bi-directional electricity meter will run backwards. Customers are billed only for the "net" energy use. Solar panels represent the future of energy. However, the maximum recorded efficiency of a commercial solar cell is 33% due to certain energy barriers at the molecular level. "I'd put my money on the sun and solar energy. What a source of power! I hope we don't have to wait until oil and coal run out before we tackle that."- Thomas Edison
