Since lithium batteries can be drained completely (or almost completely, depending on the brand) without suffering damage, you may only need half as many lithium batteries to have the same usable power. This is also true if your RV has a bank of 6V deep-cycle batteries. In this case, each pair of 6V batteries (which are wired together in series to create ...

The stock battery charger, though not explicitly rated for lithium, had a charging profile that still accounted for most of the battery charging needs. The battery would also charge from our solar panel and when towed behind our Jeep. It worked beautifully while we owned it. While we no longer own the Casita, we are still in touch with the new owners, who advised it is ...
