

# Where is the lithium battery safety cabinet in Pristina

How to protect lithium ion batteries from theft?

As lithium-ion batteries are also an expensive energy source, choosing a secure storage solution, such as a lockable battery cabinet, assists with the prevention of theft. Battery cabinets should be equipped with a failsafe locking system, to prohibit unauthorised entry to the lithium ion battery stores.

What is a battery cabinet?

Cabinets provide a controlled environment for the storage and charging of Li-Ion batteries and devices. While all battery cabinets are designed and manufactured a little differently, there are 5 key features that you should look out for. These risk control features include the provision of:

How do I choose a lithium ion battery cabinet?

Look for a battery cabinet that is constructed with a heat and fire barrier. This will be a thermal air barrier between the sheet steel walls of the cabinet, that allows a small window of time for fire equipment to be used and/or evacuations to be completed. **IMPORTANT:** When lithium ion batteries catch fire, they're very hard to put out.

Where should a battery cabinet be located?

Therefore, you should consider a battery cabinet that is equipped with a liquid-tight leak containment sump in the bottom part of the cabinet. **IMPORTANT:** Spill kits should be located within 30 metres of any hazard in your business, including batteries which may be susceptible to leaking.

Should you install a Li-ion battery charging and storage cabinet?

As more people use this modern energy source, the more we hear about the hazards associated with li-ion battery use. To avoid serious incidents such as battery fires and explosions, we recommend installing a battery charging and storage cabinet to control risk. However, most people still aren't fully aware of how a cabinet can reduce these risks.

Are battery Cabinets based on chemical cabinets?

In this article, we give you answers to these important questions. Many battery cabinets are based on chemical cabinets, also known as EN 14470-1 cabinets or PGS 37 cabinets. These types of cabinets have specific characteristics: They are intended for storage of paints and solvents. They protect the contents from fire starting outside the cabinet.

Where can you safely charge your lithium-ion (bike) batteries, and why isn't a safety cabinet the safest option?

In this blog, we explain how to charge your batteries reliably and safely, and where safety cabinets fall short.
