

Why put solar panels at home

Why should you install solar panels?

Solar panels provide multiple benefits. They can help you economize on your electricity bills, increase your property value, and contribute to a cleaner future for the next generations. Below are ten reasons to install solar panels. So buckle up! 1. Economize on Electricity Bills

Why should you use solar power for your home?

Generating your own solar power can give you the freedom to keep the lights on if there's a disruption in power. Residential solar energy systems paired with battery storage--generally called solar-plus-storage systems--provide power regardless of the weather or the time of day without having to rely on backup power from the grid.

Should you add solar panels to your home?

This isn't the case for renewable electricity tariffs sold by energy suppliers. Adding solar panels improves the energy performance of your home, too, and can boost your energy performance certificate (EPC) rating.
