

Wuyang Battery

In a Li-ion battery, Li + is the guest ion and the host network compounds are metal chalcogenides, transition metal oxides, and polyanion compounds. These intercalation compounds can be divided into several crystal structures, such as layered, spinel, olivine, and tavorite (Fig. 4). The layered structure is the earliest form of intercalation compounds for the ...

The solution adopts high energy density lithium battery packs, combined with highly efficient motor drive technology, which significantly improves the range and environmental performance of boats. In addition, through the intelligent battery management system, the battery status can be monitored in real time to ensure navigation safety and ...
