

Yerevan battery cabinet installation

How to install a battery storage cabinet?

Mounting mechanism - they vary depending on whether the battery storage cabinet is a pole mount, wall mount, or floor mount. The mechanism allows you to install the battery box enclosure appropriately. Racks - these systems support batteries in the enclosure. Ideally, the battery rack should be strong.

How do you reinstall a battery cabinet?

Reinstall the left side panel on the left-most battery cabinet after interconnection. Push the third battery cabinet into position, align with the seismic anchoring (if any), level the battery cabinet, and interconnect with the other battery cabinets as described in step 2, step 3, and step 5.

How to build a battery cabinet?

Step 1: Use CAD software to design the enclosure. You must specify all features at this stage. Step 2: Choose suitable sheet metal for the battery box. You can choose steel or aluminum material. They form the perfect option for battery cabinet fabrication. Step 3: With the dimension from step 1, cut the sheet metal to appropriate sizes.

How do you level a battery cabinet?

Remove the side panels that are adjacent to the other battery cabinets. Push the right-most battery cabinet into position. For seismic anchoring, ensure that the rear seismic bracket connects to the rear anchors. Lower the levelling feet until they connect with the floor - use a bubble-level to ensure that the cabinet is level.

How do I remove the battery tray from the battery cabinet?

Remove the front cover from the battery cabinet by loosening the top two captive fasteners and lifting the cover up and out of the battery cabinet. Slide the battery tray out of the battery cabinet until it stops. Place the batteries inside the battery tray oriented as shown in Figure 8. Place the provided spacers between the batteries.

How many battery cabinets are available for the 93pm and 93e?

For the 93PM and 93E product lines, there are two different battery cabinets: Small and Large Battery Cabinet. The battery block configuration in the chosen battery cabinet must always match the UPS requirement. Used battery configuration must be inserted into UPS settings during commissioning or start-up.
